ITSO POST Compliance Certificate

Certificate Number: C-00203-1
Product/Service name: VIX PCP6100 Rail Validator with CAST
Version: 214.12 with CAST ver.1.0
Compliant with: ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9

ITSO received a request submitted by Vix Technology, for the recertification of the VIX PCP6100 Rail Validator with CAST (software version 214.12 with CAST ver.1.0). As indicated in Certification Test Report (POST-1602159168_VIX CAST PVAL PCP6100_Recertification C00203_Test Report), ITSO has found reasonable evidence that the submitted product/service complies to ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9.

Your product/service will be included in the certified products list, published on ITSO website.

Please note that the present Certification is subject to the following general terms and conditions along with conditions/constraints as detailed in Schedule B:

- i. The present Certification is granted on the basis of the ITSO Certification & Compliance Policy and therefore is valid as of today and will expire 7 years from issue, however if the Product/service contains a sub-assembly, the above referenced product will only be valid if the sub-assembly holds a valid ITSO certificate.
- ii. If the Product version number is changed, Vix Technology must notify ITSO of this fact in writing by supplying the release notes. Any change in the Product that may generate a different behaviour with respect to the ITSO TS 1000 Specification version 2.1.4 corrigendum 9 standards may be considered a major modification subject to a new evaluation in order to maintain the present Certification.
- iii. The present Certification granted to Vix Technology for the above referenced Product is non-transferable to any other vendor.
- iv. When request by an ITSO Licenced Operator, the ITSO Registered Supplier must supply a copy of the Test Report.

VIX PCP6100 Rail Validator with CAST

Schedule A

The VIX PCP6100 POST consists of a not-always-online rail validator and depot service (CAST) communicating with HOPS. The PCP6100 connects periodically to the CAST device manager via ethernet (over wired or mobile data channels). The PCP6100 uses web services to exchange data with the CAST Device Manager software; this data is in proprietary encrypted format over a private network.

The CAST software converts between this format and standard ITSO XML. The CAST software communicates with the HOPS using XML file-exchange on a frequent periodic basis.

The CM supported is shown in the following table:
