ITSO Remote POST Client Compliance Certificate

Certificate Number: C00225
Product/Service name: Unicard RDG SDK -.Net Windows Client
Version: 3.0.7.1
Compliant with: ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9

Dear Michael,

ITSO received a request submitted by Unicard Limited, for the new certification of Unicard RDG SDK -.Net Windows Client (software version 3.0.7.1). As indicated in Certification Test Report (ref. RPC-1657635671 – Unicard RDG SDK -.Net Windows Client – New Certification), ITSO has found reasonable evidence that the submitted product/service complies to ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9.

Your product/service will be included in the certified products list, published on ITSO website.

Please note that the present Certification is subject to the following general terms and conditions along with conditions/constraints as detailed in Schedule B:

- i. The present Certification is granted on the basis of the ITSO Certification & Compliance Policy and therefore is valid as of today and will expire 7 years from issue, however if the Product/service contains a sub-assembly, the above referenced product will only be valid if the sub-assembly holds a valid ITSO certificate.
- ii. If the Product version number is changed, Unicard Limited must notify ITSO of this fact in writing by supplying the release notes. Any change in the Product that may generate a different behaviour with respect to the ITSO TS 1000 Specification version 2.1.4 corrigendum 9 standards may be considered a major modification subject to a new evaluation in order to maintain the present Certification.
- iii. The present Certification granted to Unicard Limited for the above referenced Product is non-transferable to any other vendor.
- iv. When request by an ITSO Licenced Operator, the ITSO Registered Supplier must supply a copy of the Test Report.

Schedule B

List of conditions and/or constraints applied by ITSO:

IPEs can be accepted for travel where the usage of the IPE is not time-critical and benchmarking is not required. E.g. where an operator or passenger can physically accept & activate a pass for a journey - not suitable for use in a rail gate, validator or a commercial service bus.

The Unicard Part 11 Client does not support the following:

- The reversal of TrxReversal.
- Auto renew before the expiry of IPE.
- Auto renew before all stored tickets are consumed.

The original expiry date, 6th December 2029, of this certificate has been amended to 23rd November 2028 due to the device not being verified with the new extended DTS EPOCH.
