ITSO Remote POST Client Compliance Certificate

Certificate Number: C00227-3
Product/Service name: Unicard Mobile SDK
Version: 1.0.31 for iOS and 1.0.44 for Android
Compliant with: ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9

Dear Michael,

ITSO received a request submitted by Unicard Limited, for the new certification of Unicard Mobile SDK (version 1.0.31 for iOS and 1.0.44 for Android). As indicated in Certification Test Report (ref. RPC-1663231161 – Unicard Mobile SDK – Recertification of C00227-2), ITSO has found reasonable evidence that the submitted product/service complies to ITSO TS 1000 Specification Version 2.1.4 Corrigendum 9.

Your product/service will be included in the certified products list, published on ITSO website.

Please note that the present Certification is subject to the following general terms and conditions along with conditions/constraints as detailed in Schedule B:

- i. The present Certification is granted on the basis of the ITSO Certification & Compliance Policy and therefore is valid as of today and will expire 7 years from issue, however if the Product/service contains a sub-assembly, the above referenced product will only be valid if the sub-assembly holds a valid ITSO certificate.
- ii. If the Product version number is changed, Unicard Limited must notify ITSO of this fact in writing by supplying the release notes. Any change in the Product that may generate a different behaviour with respect to the ITSO TS 1000 Specification version 2.1.4 corrigendum 9 standards may be considered a major modification subject to a new evaluation in order to maintain the present Certification.
- iii. The present Certification granted to Unicard Limited for the above referenced Product is non-transferable to any other vendor.
- iv. When request by an ITSO Licenced Operator, the ITSO Registered Supplier must supply a copy of the Test Report.

Schedule B

List of conditions and/or constraints applied by ITSO:

IPEs can be accepted for travel where the usage of the IPE is not time-critical and benchmarking is not required. E.g. where an operator or passenger can physically accept & activate a pass for a journey – not suitable for use in a rail gate, validator or a commercial service bus.

- If standalone (non-RSPS3002) Pass Activation is required, then the TYP22 needs to be in Stored Pass mode (TYP22ValueFlags Bit1=1) with AutoRenew disabled (TYP22ValueFlags Bit0=0) and at least 1 stored pass remaining.

The Unicard Mobile SDK does not support the following:

- The reversal of TrxReversal.
- Auto renew before the expiry of IPE.
- Auto renew before all stored tickets are consumed.
